Scores

Completeness: 2/4

Efficiency: 4/4

Style: 4/4

Documentation: 4/4

Positive aspects of the submission

Thank you for your submission Hashim, you have almost completed this task 🍌 You have made sure to keep your code clean with good use of spacing and indentation, making it easy to read, debug, and maintain. Additionally, your code is well documented with brief and informative comments, allowing the reader to navigate and understand your code quickly, further improving its maintainability.

Aspects of the submission that could be improved

For task 1 the only thing that is incorrect that I can see is there's a slight issue in the subtractNumbers function. The order of subtraction seems to be reversed. The task specifies subtracting the second number from the first number, but the function subtracts the first number from the second number.

I have provided a link below that will give you a bit more extra info on scope:

<https://www.freecodecamp.org/news/scope-in-javascript-global-vs-local-vs-block-scope/#:~:text=At%20its%20core%2C%20scope%20in,variable%20is%20valid%20and%20accessible>.

Overall feedback

You are SO close to completing this task 🍌 If you could please make these suggested changes I will happily go through your task again.
