The screenshot displays the MongoDB Atlas Project Access Manager interface. The browser's address bar shows the URL: `cloud.mongodb.com/v2/66437b26f8cf37d4d034499#/access`. The Atlas header includes the organization name 'Hashim's Org...', navigation links for 'Access Manager' and 'Billing', and a user profile dropdown for 'Hashim'. The main content area is titled 'Project Access Manager' and includes a sub-header 'HASHIM'S ORG - 2024-05-14 > PROJECT 0'. Below this, a message states: 'Manage access to this project for users, teams, and API keys.' The 'Users' tab is selected, showing a table with the following data:

Display Name	Email Address	Project Role	Created	Last Login
Hashim Aziz Muhammad	azizmuhammadhashim6@gmail.com	Project Owner	05/14/24 - 04:54:30 PM	05/14/24 - 07:14:15 PM
PENDING INVITE	allreviewers@hyperiondev.com	--invite sent--	05/14/24 - 07:29:05 PM	

A sidebar on the left contains navigation links: PROJECT, Settings, Alerts, Activity Feed, Access Manager (highlighted), Support, and Integrations. A right-hand tip box reads: 'Looking to manage access to an organization? Check out the Organization Access Manager to add, delete, and manage users, teams, and API keys within a specific organization. MANAGE ORG ACCESS'. The footer shows 'System Status: All Good' and copyright information for MongoDB, Inc. The Windows taskbar at the bottom indicates the date as 14 May 2024.
