### Scores

Completeness: 4/4

Efficiency: 4/4

Style: 4/4

Documentation: 4/4

### Positive aspects of the submission

Hello Hashim. I hope you are doing well.

Hashim, it's great to see your efforts in completing the task. You've effectively followed the steps outlined and addressed the requirements of the assignment.

Your script `remove_duplicates.js` correctly imports the `lodash` library and utilizes the `uniq` function to remove duplicates from the array. The use of `lodash`'s utility functions demonstrates an understanding of leveraging external libraries to streamline development tasks.

Your `package.json` file is properly configured with the necessary scripts, including the `rdup` script to run the `remove_duplicates.js` script. The dependency on `lodash` is also correctly specified.

### Overall feedback

Overall, your submission meets the task requirements effectively. Keep up the good work, Hashim
