Student number: HA24010012783

Scores

Completeness: 2/4

Efficiency: 1/4

Style: 1/4

Documentation: 1/4

Positive aspects of the submission

Thank you for your submission, Hashim. You've done great to have come this far in this capstone project. Your code is very well formatted, with good line spacing and indentation, as well as consistent and informative comments. Your filing structure also looks great! It's very easy to navigate and in accordance with current standards.

Aspects of the submission that could be improved

Completion: Unfortunately, it is not currently possible to run your web-app. The reason for this is it seems that you are attempting to import a number of libraries in your code which has not been included into your package.json file. Examples of these are react-redux, formic and react-icons.

Please make sure that all necessary dependencies have been installed, that you have met all the requirements for this task and that your code runs without any error before resubmitting

Overall feedback

Overall, the code itself is looking great Hashim. You are very close to completing this task. A final score for documentation, efficiency and code style will be given once the task has been marked as completed since this is not the final version of your submission and changes could affect those areas. I look forward to your next submission.
