### Scores

Completeness: 4/4

Efficiency: 4/4

Style: 4/4

Documentation: 4/4

### Positive aspects of the submission

Thank you for your submission Hashim. Awesome work here! You have done well to meet the task requirements, showing that you have a good grasp of using previous lessons learnt in this project, and creating a full stack web application 🍌 You have made sure to keep your code clean with good use of spacing and indentation, making it easy to read, debug, and maintain. Additionally, your code is well documented with brief and informative comments, allowing the reader to navigate and understand your code quickly, further improving its maintainability. Your file structure of the project should be well-organised and easy to understand and use.

### Aspects of the submission that could be improved

If you ever get stuck and you need to have a document to look through I have added a link for a React beginners guide: <https://www.freecodecamp.org/news/react-for-beginners-handbook/>

Just a link to videos that help explain in detail how Express middleware works, [https://www.youtube.com/watch?v=KtnHb7FMk2Q&list=PLp5OdWW\\_m40Vruw9uKGNqySCNFLXK5YiO](https://www.youtube.com/watch?v=KtnHb7FMk2Q&list=PLp5OdWW_m40Vruw9uKGNqySCNFLXK5YiO)

There is something called Emmet abbreviations and it makes coding a lot faster, follow the link below and see how you can use them: <https://docs.emmet.io/cheat-sheet/>

The link below is to show you how to install Grammarly as a vs code extension: <https://www.youtube.com/watch?v=LiDvXj8-tpo>

### Overall feedback

You are SO close to completing this task 🤞 If you could please make these suggested changes I will happily go through your task again.

A final score for documentation, efficiency and code style will be given once the task has been marked as completed since this is not the final version of your submission and changes could affect those areas.
