Positive aspects of the submission

Thank you for your submission Hashim! Amazing work here! You have done well to meet the task requirements, showing that you have a good grasp of React Components for this task 🍌 You have made sure to keep your code clean with good use of spacing and indentation, making it easy to read, debug, and maintain. Additionally, your code is well documented with brief and informative comments, allowing the reader to navigate and understand your code quickly, further improving its maintainability. Your clone looks amazing and functions incredibly! Great job with the CSS and making the app responsive 🍌

Aspects of the submission that could be improved

If you are wanting to practice React below is a free course that you can go through if you like:
