Efficiency: 4/4

Style: 4/4

Documentation: 4/4

Positive aspects of the submission

Dear Hashim,

Thank you so much for the project submission, the task is very well done.

✅ Your react project is functional with Nice looking at increment and decrement buttons and your screenshots show that the tests are passing.

✅ The project is created using create-react-app.

✅ Required Greetings component is provided

Aspects of the submission that could be improved

Although you used CSS, it's much better to link to an external stylesheet. When styles are stored in a separate file, It is easier to modify and update the appearance of your entire website without having to edit each component individually. This saves time and reduces the risk of introducing errors.

As of now you can in your free time, think of adding a footer and header to your project

React is one of the most popular JavaScript libraries for building dynamic and user-friendly web interfaces. Mastering it can open doors to exciting job opportunities and empower you to create innovative web applications. I encourage you to master the library.

Overall feedback

I am looking forward to your next task submission, keep it up!
