Positive aspects of the submission

Thank you for your submission Hashim, Awesome work here! You have done well to meet the task requirements, showing that you have a good grasp of CSS and you have done an amazing job with bootstrap, your website looks great 💪 👌 You have made sure to keep your code clean with good use of spacing and indentation, making it easy to read, debug, and maintain. Additionally, your code is well documented with brief and informative comments, allowing the reader to navigate and understand your code quickly, further improving its maintainability.

Aspects of the submission that could be improved

I would encourage you to address a few aspects of your code, I noticed that you have a link to a styles.css file but there was no file to be found, This could have been left there as you used bootstrap instead, just be weary of leaving things like this as it might confuse someone reading your code thinking there might be something missing.

Then on line 117 your onclick does not function as you have made an error here, if you could please see to in so that it will function they was you want it too.

If you are interested in writing your own CSS i have a few links below that will interest you:
for general CSS -- https://www.w3schools.com/css/

for using display: flex -- https://flexboxfroggy.com/
for using display: grid -- https://cssgridgarden.com/
