Positive aspects of the submission

Hashim ,

Thank you so much for your portfolio project, I am impressed by your design skills, there is potential in UI/UX design, and I sensed that.

The page has clickable menus and they redirect to their respective sections.

You have added two testimonials related to your services

Your portfolio is mobile-friendly.

Aspects of the submission that could be improved

While reviewing ,I realized that in HTML file you are using some inline CSS .Using inline styles can lead to inconsistencies in the way elements are styled across your website.Imagine if the project gets bigger .

Maintaining a consistent look and feel becomes more challenging. It's highly recommended to use separate CSS files(you did that) to define styles for your website. This promotes cleaner code organization, easier maintenance, and better scalability.

Overall feedback

Your task is very well done and comprehensive, I look forward to your next task submission . Keep it up.
